

What is GenYES New Hampshire?

Program Overview

GenYES New Hampshire is a program where teams of 15-30 students in an elementary, middle, or high school are prepared to support both technology integration and infrastructure support.

The GenYES NH program is a creative approach to make lasting and transformative improvements in teaching and learning. The *Office of Educational Technology* at the *New Hampshire Department of Education* has partnered with the nonprofit Generation YES to help develop a statewide initiative to provide an exciting research-based model engages students in supporting technology integration and use in our schools.

GenYES has been implemented in more than 2,100 schools throughout the U.S. and has been transforming students' lives for more than 20 years.

Meeting Schools' Technology Needs

GenYES New Hampshire will meet the following needs:

Teacher Technology Support: Teachers are overwhelmed by the amount of work assigned to them. The amount of technology continues to grow and there is insufficient support for teachers to learn how to integrate these tools.

IT Technology Support: IT staff members need assistance to ensure that all of their school's tech infrastructure is operational.

Digital Equity: New Hampshire is seriously addressing the needs underserved rural, females, and minority students. ICT workers are predominantly white males and other students need rigorous technology courses to close this gap.

Technology Experience: Students need the opportunity to work in ICT workplaces.

The Average GenYES School

These numbers reflect what the average GenYES school accomplishes in one year.

What is a TAP?

TAP stands for Technology Assistance Project. TAPs usually involve technology support, mentoring for teachers or students, or content creation.

What is an STL?

STL stands for Student Technology Leader. Students in a GenYES class who do TAPs for teachers, students, and IT staff are called STLs.

Teacher Testimonials

"We just concluded our last teacher workshop with the students and the feedback from the teachers supports GenYES research- what teachers liked MOST about the workshops were working with the GenYES students! They want the students to continue their learning in instructional design to support teachers in the future, so I have a direction for next year."

Janna Elfrink, Reeds Spring High School

"Kids know a lot, and GenYES is an excellent leadership opportunity for them that builds confidence. Even quiet or shy kids can be leaders."

Joanella Mendoza, Madison Park Academy K-5

"GenYES is a win, win, win. IT Departments get less on their plate. Staff get things fixed. Students feel valued and empowered."

David Berg, Big Picture School

"Student Tech Leaders have helped me become a better teacher. Recently, I had a student record one of my classes for PD. It was a huge help, I learned so much."

Megan McKenna, Park City High School

How a NH School Can Get Started

The first step in establishing a GenYES program in your school is to contact Generation YES. Send an email to support@genyes.org, or call toll-free at 1-888-941-4369. Our office hours are 12:00 PM to 8:00 PM EST.

We'd be happy to answer any specific questions you may have and can send you additional materials or quotes. More information is available at:

GenYES.org/genyes.

Contact Generation YES soon and join other New Hampshire schools that are making GenYES happen in 2017-18. For more information on the New Hampshire Initiative, contact the *Office of Educational Technology* at the *NH Department of Education*.

*Values for dollars saved are calculated by the national value of volunteer time, set at \$24.14 per hour, times the hours of work that students have provided. The value of volunteer time is based on the hourly earnings (approximated from yearly values) of all production and non-supervisory workers on private non-farm payrolls average (based on yearly earnings provided by the Bureau of Labor Statistics) for the national average. You can read more on www.independentsector.org/volunteer_time.
