

IT AND ME—GRADE 9 CURRICULUM

Standard: Internet

Time: Up to 1 hour

Objectives: Students will

1. Understand the history of the Internet
2. Be able to search the Internet to find specific information

Setting:

Computer lab with Internet access

Materials:

Internet History Scavenger Hunt handout

Teacher's Role:

Explain to the students how to conduct a search on the Internet. Handout the Scavenger Hunt questions and be available to assist students who are having difficulty finding answers to the questions. *This lesson can also be used as a quiz on any topic. I go online the night before the quiz to find current news items and generate a list of questions based on those items. It is important that you conduct a second search using your questions as the starting point to make sure that the students will be able to find the answers using normal search techniques.*

School to Career Connection:

The media center specialist may be able to assist students in search techniques.
